EXPERIENCE, PROJECTS

Front End Web Developer
SoCalTubSpecialist

- Designed and built a new front end webpage out of ReacJS and TailwindCSS for a vanity installation company
- Provided an initial mockup of new website and received feedback before production.
- Increased user stay-time via cleaner user interface.
- increased revenue intake with new website by revamping the front-end to be user friendly, fast, and follow proper SEO.

Front End Web Developer
AimeeOkiFoundation

- Took previous website from Wix cms to more personalized HTML, CSS, and JavaScipt webpage.
- Provided personalized mockup design for bi-polar awareness foundation and converted that design to usable code.
- Brought new functionality to webpage with javascript libraries and Jquery.
- Increased user retention due to better user interface/experience.

Web Developer
Tybensonportfolio

- Created a fully functional ReactJS, Redux portfolio to showcase all my projects and effieciency with ReactJS and it's libraries. The portfolio uses many different key React, Redux tools such as hooks, state, state management, store, actions, reducers, etc..

Web Developer
Kintone Databases Workshop

- Created a ReactJs app that uses an ExpressJs backend to get data from the Kintone data base. with this project you can grab the current list of data and display it, or append new data to that list.
